

### Short Biography:

I am currently a Senior Research Specialist working in the Biostatistics, Epidemiology and Biomathematics Research Core at Weill Cornell Medicine-Qatar, Cornell University. I am the lead statistician for several ongoing projects. I have also presented several introductory biostatistics workshops for research staff and medical interns.

I enjoy translating the numbers and data statistics into stories and identifying research priorities, which in turn can be used by clinicians, health policy makers, and the public to make public health evidence informed decisions.

I earned my B.Sc from the University of Wisconsin-Madison, USA, and my MPH from the American University of Beirut, Lebanon. I am fluent in English, Arabic and French
